

STRATEGY DESCRIPTION & HIGHLIGHTS

The Renaissance Small Cap Growth Strategy employs a disciplined decision-making process to create and manage investments in smaller sized, growth-oriented companies. Individual stocks typically sell at reasonable valuations and are supported by above-average corporate profitability and accelerating earnings growth. Each portfolio contains approximately 50-60 individual stocks of predominately U.S.-based public companies.

The objective of the Renaissance Small Cap Growth Strategy is to provide clients with a long-term rate of return better than that of comparable small-cap stock indices.

- Outperformed the Russell 2000 Growth⁽¹⁾ over the past 1, 3, 5, 7 and 10-year periods and since inception⁽²⁾, gross of fees, on an annualized basis.
- Outperformed the S&P / Barra Small Cap 600 Growth over the past 1, 3, 5, 7 and 10-year periods and since inception⁽²⁾, gross of fees, on an annualized basis.
- Attractive relative risk/reward profile, since inception⁽²⁾.
- A disciplined process of “growth at a reasonable price” investing.

⁽²⁾ Inception date: 1/1/96.

⁽³⁾ Weights as of the end of the presentation period.

⁽⁴⁾ Cumulative total weighting may not add up to 100% due to rounding of percentages to the nearest decimal place.

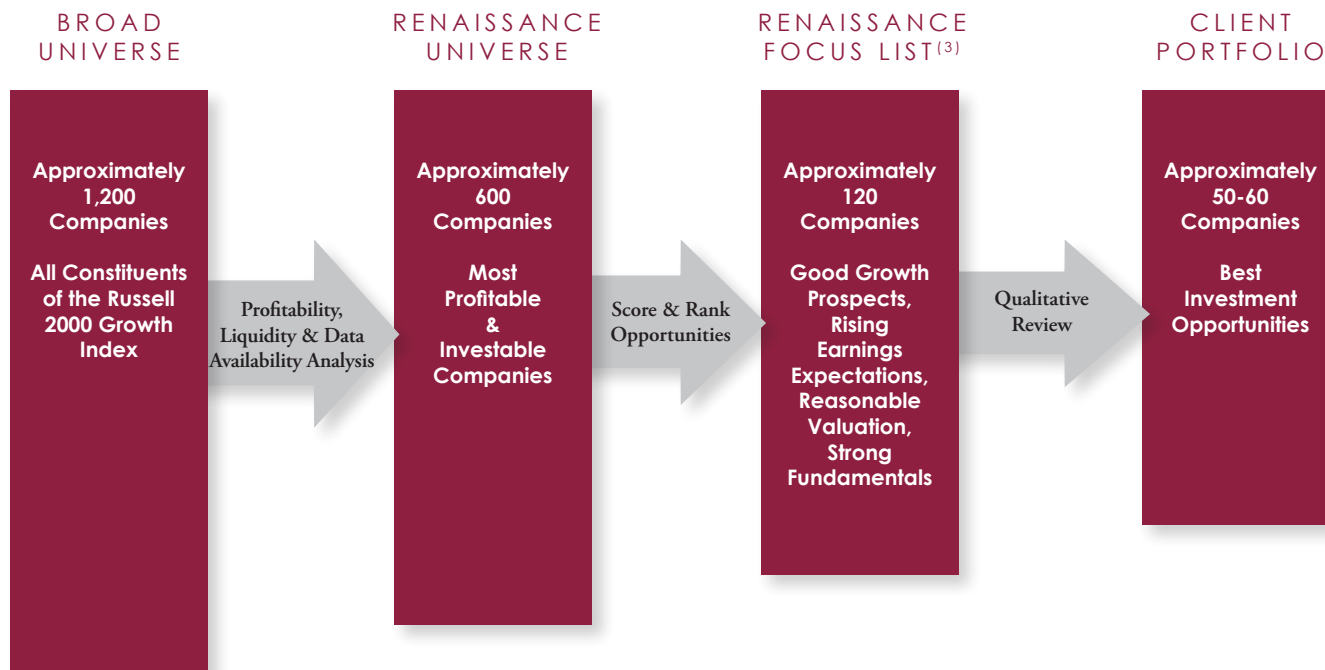

⁽⁵⁾ Based on a representative account of the strategy discussed and shown as supplemental information to the GIPS compliant presentation. Portfolio characteristics (e.g., sector weights,

valuation, growth rate) are based on a representative account that we believe is illustrative of the strategy. Characteristics and/or holdings may not be the same for all accounts invested in the strategy due to factors such as pending trades or account restrictions.

⁽⁶⁾ Percentages may not match the actual difference between the representative account and the benchmark due to rounding of percentages to the nearest decimal place.

⁽⁷⁾ Composite statistics based on gross returns calculated quarterly. The calculation methodology for each statistic is available upon request.

BUY DISCIPLINE⁽¹⁾⁽²⁾

SELL DISCIPLINE⁽²⁾

Characteristics of Sell-Ranked Stocks

- High Valuation
- Slowing Rates of Earnings Growth
- Negative Earnings Estimate Revisions
- Hard Sell: Market Cap Surpasses \$25 Billion

Risk Control

- Consistently hold between 50 and 60 positions.
- Initiate new positions at an equal weight within the portfolio, at cost.
- Scale back positions before hitting double weight in the portfolio.
- Maximum industry and sector weights of 20% and 40%, at cost.
- Consistently sell positions where fundamental characteristics have deteriorated in favor of higher ranked stocks.

Stock rankings are used as a tool in our sell decision process.

⁽¹⁾ Chart is for illustrative purposes only and is not drawn to scale.

⁽²⁾ This is an overview of the investment process that guides our decision making. While stock rankings are used as a guide, the Portfolio Manager uses fundamental analysis to determine all buys and sells.

⁽³⁾ The Focus List is based on the output of our proprietary quantitative screening process and it represents the top 20% of our eligible investment universe for this investment strategy.

FINAL 12/31/2020										

* Beginning January 1, 2006, "pure" gross-of-fees returns do not reflect the deduction of any expenses, including trading costs as these are wrap accounts. "Pure" gross-of-fees returns are supplemental to net returns.
 ** From January 1, 1996 through December 31, 2005, the disclosed returns are presented gross of fees as these are institutional accounts.
 *** Not meaningful figure due to five or fewer accounts invested for the entire year.
 **** Firm Assets do not include UMA program assets for GIPS purposes.
 As of 12/31/2020, Renaissance managed an additional \$2,177.1 million in UMA programs, totaling \$3,056.1 in assets under management and shown as supplemental information to the GIPS compliant presentation.

Renaissance Investment Management (RIM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Renaissance has been independently verified for the periods from January 1, 2006 through June 30, 2020. The verification report is available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Firm Definition: The Renaissance Group LLC, which does business as Renaissance Investment Management (RIM), is a registered investment advisor established in 1978, with an office in Covington, KY. RIM is an affiliate of Affiliated Managers Group based in West Palm Beach, FL. RIM manages equity, tactical, balanced and fixed income assets for a variety of clients including high net worth, institutional and sub-advisory relationships. A complete list and description of the Firm's composites is available upon request.

Composite Composition: The Small Cap Growth Wrap Composite portfolios consist of approximately 50-60 mainly small cap domestic equities, which focus on companies demonstrating financial strength, attractive growth potential, rising earnings expectations and attractive valuation. The Small Cap Growth Wrap Composite, created on January 1, 2006, includes all fee-paying, non-wrap Small Cap Growth Institutional Composite account returns from its inception on January 1, 1996 through December 31, 2005. From January 1, 2006 to present, the Small Cap Growth Wrap Composite includes all Small Cap Growth fee-paying, direct-managed accounts with wrap fee arrangements and fee-paying SMA accounts that adhere to the SMA sponsor's inclusion guidelines. As of January 1, 2021, the composite was redefined to also include tax managed accounts which were previously excluded. The composite does not include non-fee-paying managed accounts. RIM will add new fully discretionary wrap portfolios to the composite when they become fully discretionary based on the policies governing composite construction. RIM will exclude terminated portfolios from the composite after the last full month they were under management. Composite dispersion is measured using an asset-weighted standard deviation of returns of the portfolios.

Calculation of Performance Returns: Performance is calculated using total returns. Monthly composite performance is asset-weighted using beginning-of-period values. Rates of return are time-weighted with geometric linking of monthly returns. Valuations and returns are computed and stated in U.S. dollars. Account performance is based on total assets in the account, including cash and cash equivalents. Performance is actual performance.

RIM has chosen to present performance for pure gross-, gross- and net-of-fees. The pure gross-of-fees performance returns are presented before management and custodial fees and all trading expenses. The gross-of-fees performance returns are presented before deductions of management and custodial fees but after the deduction of all trading expenses. The net composite performance returns prior to December 31, 2005 are presented after deducting a model fee of 300 basis points from the gross return, which is the highest wrap fee represented by the composite. The net composite performance returns after December 31, 2005 are presented after deducting a model fee of 300 basis points from the pure gross return. Wrap fees, and fees in lieu of commissions, vary across brokerage firms and accounts based upon account size and other factors. The various bundled fees may include trading, management, custodial expenses and other administrative fees depending upon the wrap program selected. These pure gross-, gross- and net-of-fee investment results for the Renaissance Small Cap Growth Wrap Composite include reinvestment of dividends and other earnings. Clients' returns will be reduced by the advisory fee and any other expenses that may be incurred in the management of the client's investment advisory account. For example, if the gross annualized return of an account over a five-year period were 5.0%, deducting one twelfth of an annual advisory fee of 90 basis points each month on the ending monthly account balance would produce a cumulative net return of 22.7%. The cumulative gross return at 5.0% per annum over a five-year period would be 28.3%. A \$1 million starting portfolio would thus have an ending net market value of \$1,227,096, \$56,262 less than the gross return ending value of \$1,283,359. There is no minimum asset size for inclusion in the composite. RIM uses trade date accounting and in-

come is accrued. Actual performance may differ from composite returns, depending on the size of the account, brokerage commissions, investment guidelines and/or restrictions, inception date and other factors. After-tax results will vary from the returns presented herein for those accounts that are subject to taxation. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

Standard Deviation: The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. According to the GIPS Standards, this is not required for periods prior to 2011.

Investment Management Fees: Wrap fees, and fees in lieu of commissions, vary across brokerage firms and accounts based upon account size and other factors. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the wrap sponsor. Total annual fees charged by wrap sponsors familiar to RIM are generally in the range of 0.75% to 3.00%.

Benchmark: The Russell 2000 Growth Index is composed of the smallest 2,000 of the 3,000 largest U.S. companies based on total market capitalization with higher price-to-book ratios and higher forecast growth values. The Russell index names are registered trademarks of FTSE Russell. RIM compares its composite returns to a variety of market indices such as the Russell 2000 Growth. This index is shown for comparison purposes only. We are not trying to explicitly manage to this benchmark. This index represents unmanaged portfolios whose characteristics differ from the composite portfolios; however, they tend to represent the investment environment existing during the time periods shown. The index cannot be invested in directly. The returns of the index do not include any transaction costs, management fees or other costs. The holdings of the client portfolios in our composites may differ significantly from the securities that comprise the index shown. The index has been selected to represent what RIM believes is an appropriate benchmark with which to compare the composite performance.

Other: Performance data quoted in any Renaissance presentation represents historically achieved results and is no guarantee of future performance. Future investments may be made under materially different economic conditions, in different securities and using different investment strategies and these differences may have a significant effect on the results portrayed. Each of these material market or economic conditions may or may not be repeated. Therefore, there may be sharp differences between the performance shown and the actual performance results achieved by any particular client. The value of an investment may fall as well as rise. Please note that different types of investments involve varying degrees of risk and there can be no assurance that any specific investment will either be suitable or profitable for a client or prospective client's investment portfolio. Investor principal is not guaranteed, and investors may not receive the full amount of their investment at the time of sale if asset values have fallen. No assurance can be given that an investor will not lose invested capital. Consultants supplied with these performance results are advised to use this data in accordance with SEC guidelines. The actual performance achieved by a client portfolio may be affected by a variety of factors, including the initial balance of the account, the timing and amount of any additions to or withdrawals from the portfolio, changes made to the account to reflect the specific investment needs or preferences of the client, duration and timing of participation as a RIM client, and a client portfolio's risk tolerance, investment objectives, and investment time horizon. All investments carry a certain degree of risk, including the loss of principal and are not guaranteed by the U.S. government.

Risks of Small Cap Growth Strategy: Small Cap Growth Wrap Composite returns may show a high level of variability. In addition to market risk, the majority of any additional risk in these portfolios is related to specific stock selection, and RIM will have significant exposure to individual securities.
